

The USGS Astrogeology Science Center

Honoring 50 Years of Public Service: Exploring the Solar System from Flagstaff, AZ

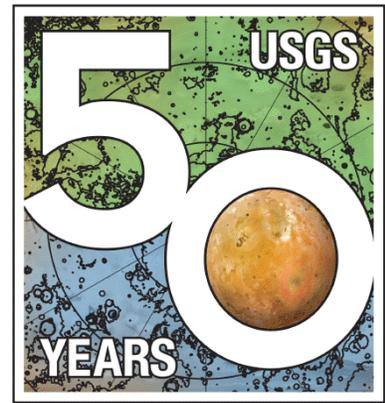

OPEN HOUSE

Sunday September 29, 2013

12 - 4 pm

2255 N Gemini Dr. (next to Buffalo Park)

Sponsored by the NASA Regional Planetary Information Facility (RPIF)

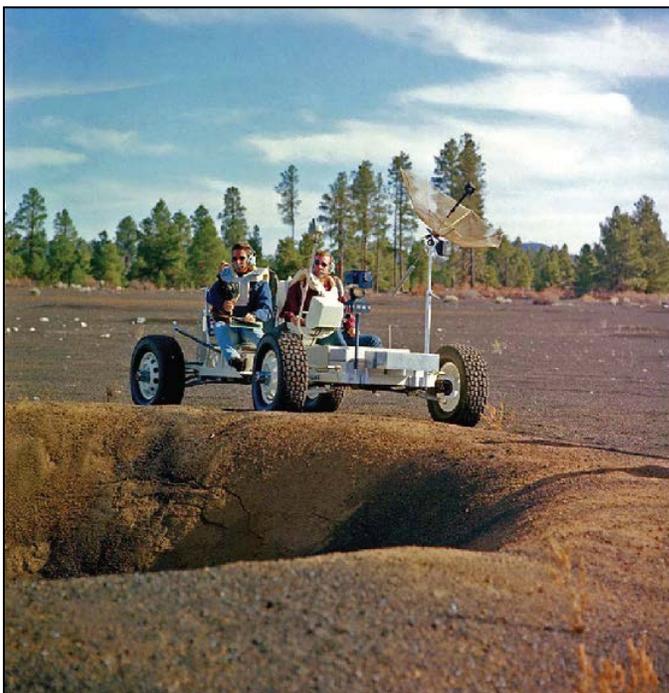

**ASTROGEOLOGY
SCIENCE CENTER**

1963 - 2013

Featuring:

- Science Talks: There will be six 20-min talks about the Earth, Moon, Mercury, Mars, and beyond.
- For the Kids: Make models of planets and the Solar System; make impact craters; cartoons and coloring.
- Rocks, Minerals, and Microscopes: See various rocks, minerals, and even meteorite samples.
- Thermal Infrared Camera Demonstration: See how hot you are, and how thermal infrared imaging technology is used in Earth and planetary science.
- Explore Planetary Images: See how USGS Astrogeology software is used to image and make maps of other planetary bodies.
- Rover: Look out for the robotic rover exploring the halls.

Geologic Map of Io
