

INTERIOR—GEOLOGICAL SURVEY, RESTON, VA—1186—08867  
Prepared on behalf of the Planetary Geology Program, Planetary Division, Office of  
Space Science, National Aeronautics and Space Administration, under contract  
W-13789.

**QUADRANGLE LOCATION**  
Photomosaic location is shown in the western hemisphere  
of Mars. An outline of 1:5,000,000-scale quadrangles is  
provided for reference.

**NOTES ON BASE**  
This photomosaic is part of a series of quadrangles selected to show areas of special  
interest on Mars. Viking Orbiter high-resolution pictures (less than 100 m per picture  
element) were used to make the mosaic. The images have been digitally enhanced to  
accentuate high-frequency detail. Image placement is based on the 1978 control net  
(Davies and others, 1978), the 1982 control net (Davies and Katayama, 1983), and the  
Mars control network (Wu and Schaller, 1984). These nets contain published standard  
errors of approximately 5 km, and agreement of points common to the nets may differ  
by as much as 1 cm at map scale. Image points from 1:2,000,000-scale controlled  
photomosaics were transferred to the Transverse Mercator projection where control  
points are sparse or not available.  
The density, distribution, precision, and accuracy of available control points used for  
this map series are extremely variable. A block of mosaics compiled in areas of  
optimum control-point distribution is not likely to match adjacent blocks previously  
compiled in areas of sparse or imprecise control. Where discrepancies exist between  
adjacent mosaics, the more recent compilation is probably more accurate. No  
attempt was made to resolve large edge discrepancies with previous compilations.  
The projection is based on a Mars Transverse Mercator (MTM) system with 20°  
zones. The scale factor at the central meridian of the zone containing this quadrangle  
is 0.9960. The projection scale is based on the oblate spheroid (flattening of 1/192) with  
an equatorial radius of 3393.6 km and a polar radius of 3375.7 km.  
**NOMENCLATURE**  
All names shown on the reduced base mosaic are approved by the International  
Astronomical Union (IAU, 1978) except for provisional names, which are indicated by  
an asterisk.  
MTM 80030 Abbreviation for Mars; Transverse Mercator projection;  
sheet 80030.  
M 500K 80/30 CM Abbreviation for Mars; 1:500,000 series; center of sheet lat  
80° N, long 30° W; controlled photomosaic (CM).

Photogrammetry, in Technical papers of the 50th annual meeting of the American  
Society of Photogrammetry, v. 2, Washington, D.C., March 11-16, 1984, p.  
459-463.

**INDEX OF VIKING PICTURES**  
The mosaic was made with the Viking pictures outlined  
above. Copies of various enhancements of these pictures  
are available from National Space Science Data Center,  
Code 601, Goddard Space Flight Center, Greenbelt, MD  
20771.

**LOCATION OF FEATURES**  
Contrast in the reduced base mosaic was purposely suppressed to  
emphasize the names.

**MTM 80030**  
**CONTROLLED PHOTOMOSAIC OF PART**  
**OF THE CHASMA BOREALE REGION OF MARS**

**NOTE TO USERS**  
Users noting errors or omissions are urged to indicate them on the  
map and to forward to U.S. Geological Survey, Building 4, Room  
454, 2255 North Gemini Drive, Flagstaff, Arizona 86001. A replace-  
ment copy will be returned.
