SDI Components

Why should NASA care about PSDI?

- NASA Strategic Plan includes:
 - expand the frontiers of knowledge, capability, and opportunity in space
 - accomplish the NASA mission mandate by effectively managing people, technical capabilities, and infrastructure

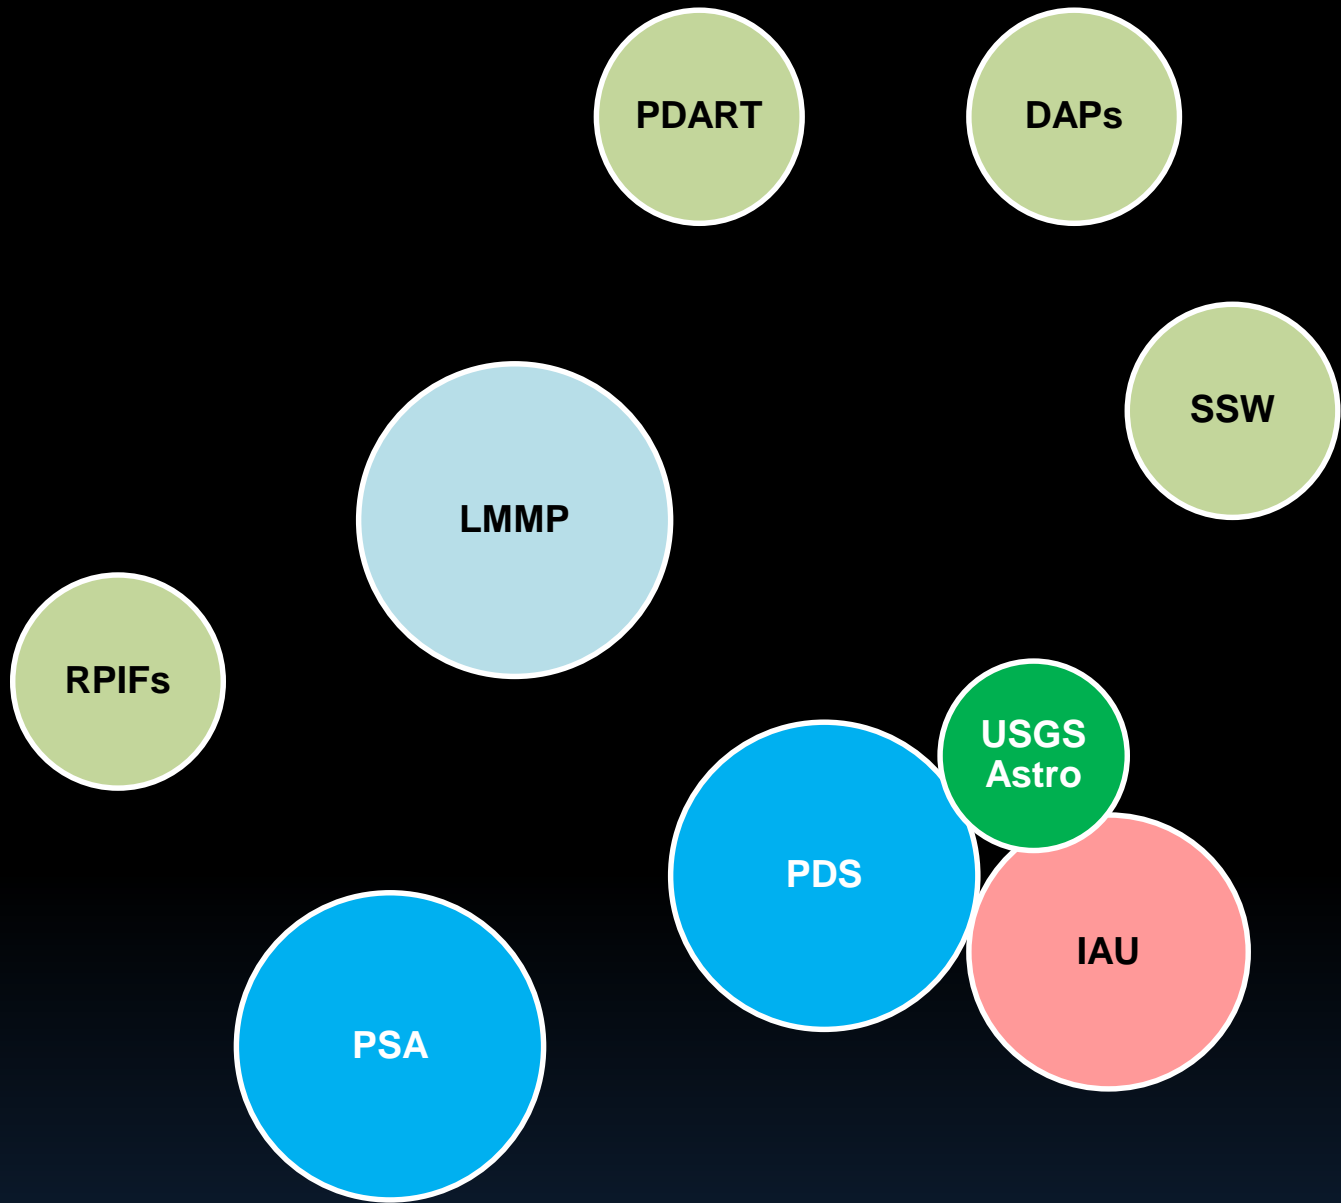

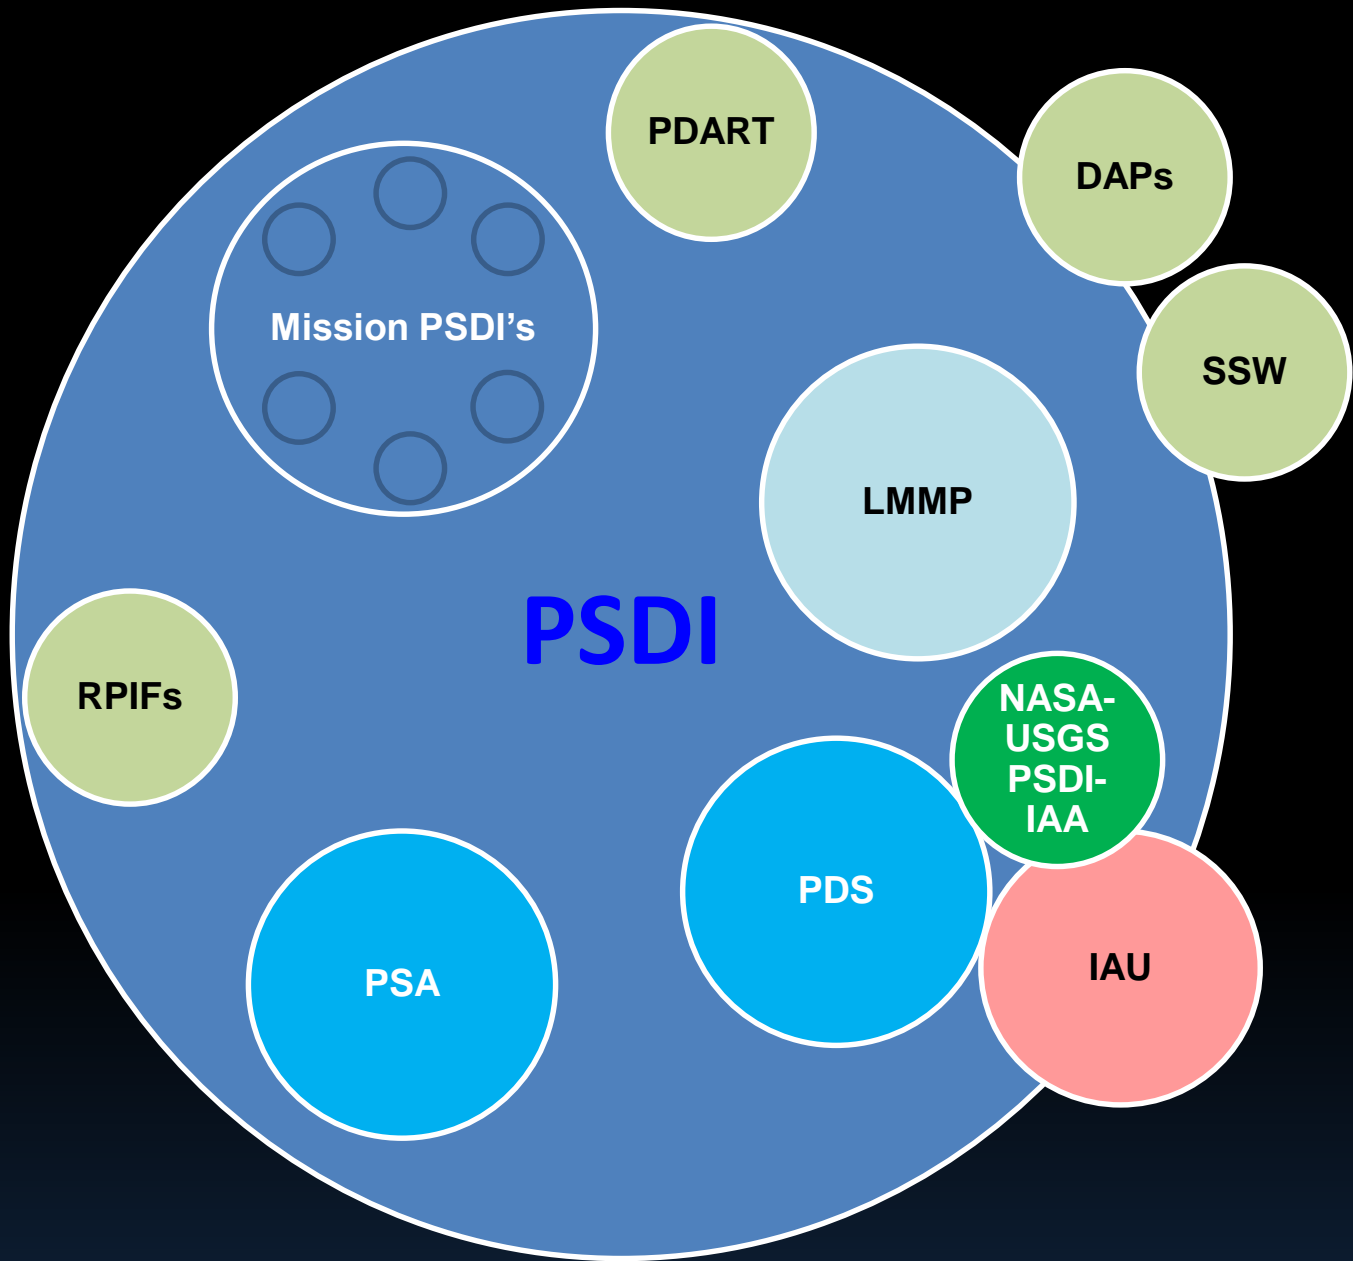

WISDOM

After the mission

PSDI for instruments, missions, planets, NASA

Why a PSDI?

- Increasing data volumes
- High data acquisition costs
- Cross-domain research teams
- Need to remove spatial data expertise as a prerequisite

PSDI Goals

- Provide discovery, access, and exploitation of spatially enabled planetary data for everyone
